

SPECIAL APPLICATION

SECURITY FITTINGS

The Davis range of security luminaires are designed for use in high abuse areas including prisons, detention cells & rehabilitation centres. They are available in both T8 & T5 models & are manufactured from a minimum of 1.2mm powder coated steel. The diffuser is a dual layer of 6mm high impact clear polycarbonate underlay with an acrylic prismatic overlay. The diffuser frames are secured to the body by lanyards. The frame is then fixed to the body with stainless steel Torx pin head or Hex pin head screws. The luminaires can be fitted with night light facilities.

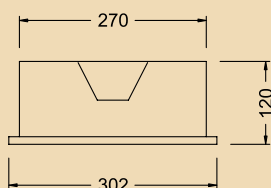

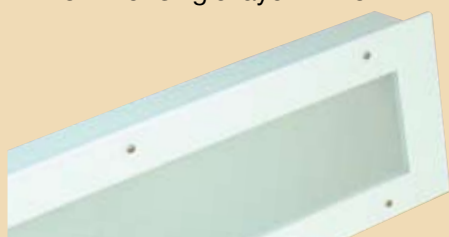

NORDUS SERIES

The Nordus is a vandal proof diffused security luminaire available in both recessed & surface mounted models. It is suitable for high security areas.
